

Company Profile

NEPTEK is a specialist in the field of material handling systems for factory and warehouse automation. Supply and integration of conveyor systems, packing machinery, inspection technology, sortation systems, storage systems, robotics, and palletising systems.

The company was founded in 2004 by current managing director Mr. Richard NEPGEN who has been in the materials handling industry for over 30 years

Building a strong relationship with our preferred partners is very important to the success of NEPTEK's business. It allows us to scale up on larger projects and still offer the same level of quality and service our clients are accustomed to.

NEPTEK partner with UNILECSA for Industrial Automation Control; EUROPEAN CONVEYORS and DÜCKER for Standardised Conveyor Modules; PREMIER TECH, OLI and ZAMBELLI for Packing and Palletising Machinery; BIZERBA for Check Weighers, Metal Detectors and Labelling Machinery; FUJI for Palletising Robots; SAVOYE for Warehouse Automation Technology and Software.

NEPTEK prides itself on well-engineered, quality solutions with excellent technical support.

Offices in both Johannesburg, Cape Town and Durban, South Africa we are strategically positioned to service the European, Middle East and African (EMEA) markets.

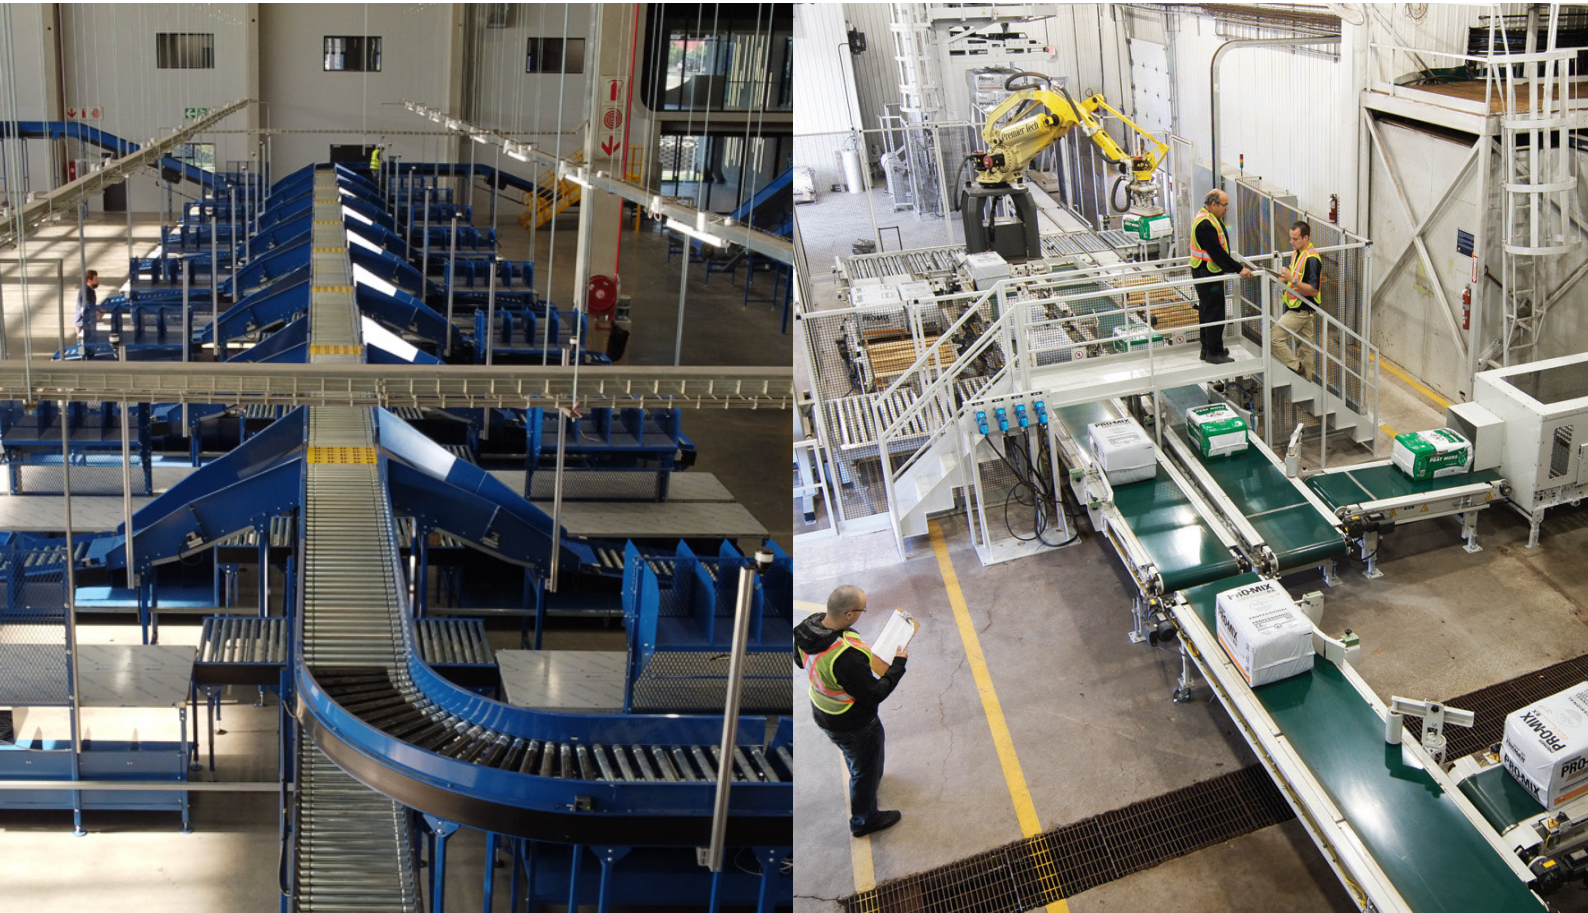

NEPTEK have supplied systems throughout South Africa and into Africa and the Middle East focusing on design, project management, implementation and after sales service.

“Value engineered fully integrated materials handling solutions to a diverse range of industries”.

At Neptek we focus on fully understanding our clients' requirements and provide solutions that will add value to your business.

We partner with our clients from the beginning and believe your success is our success and see every client as a long-term relationship of growth, trust and support.
