

# End of Line Packing Systems

NEPTEK supply a range of semi and fully automatic packing machinery as standalone equipment or integrated to form complete end of line systems. NEPTEK, together with our partners in South Africa, Europe, and Japan, can supply functional, reliable, and highly efficient solutions. A great deal of emphasis is placed on energy efficiency and lowering the consumption of packaging material to help protect the earth's carbon footprint and save costs.

# Industries

NEPTEK have supplied end of line packing solutions to a diverse range of industries which include:

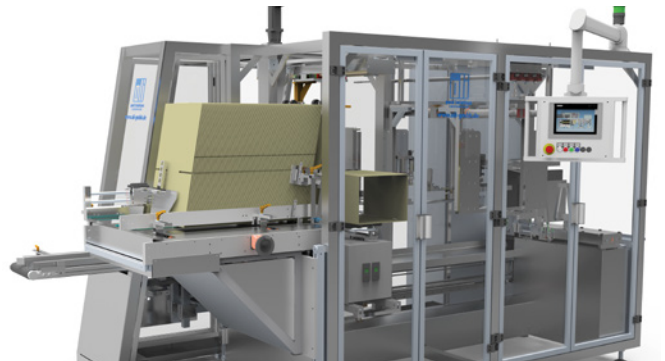

- Food and Beverage
  - Sugar Mills
  - Maize and Flour Mills
  - Snack Foods
  - Canned Fruit and Vegetables
  - Confectionary
  - Pet Food
  - Sauces and Dressings

  - Tea and Coffee
  - Carbonated and Non-Carbonated Soft Drinks
  - Beer, Spirits and Wine
- FMCG
- Printing
- Compost and Fertilizer
- Seed and Grain
- Chemicals (Hazardous and non-hazardous)

## Solution Types

Weighing and Bagging

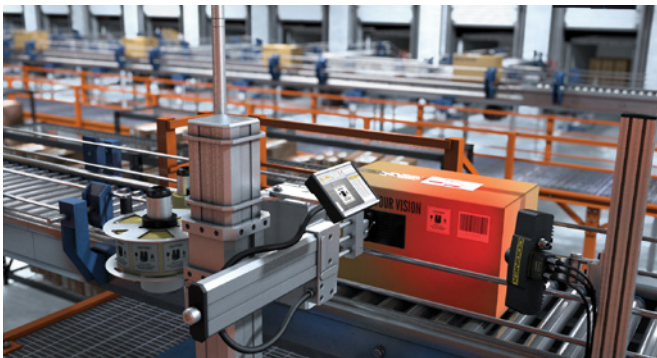

Carton Erecting, Case Packing and Sealing

Wrap Around Case Packing

In-Line Shrink Wrapping and Tray Insertion

Labelling

Inspection Systems

Conveyor Systems

(Refer to our Conveyor Systems Brochure)

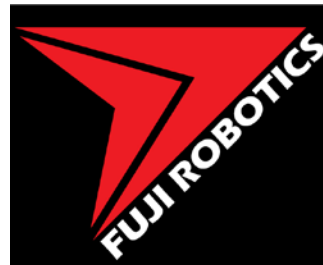

Palletising Systems

(Refer to our Palletising Systems Brochure)

## Partners

- **Premier Tech** – Automatic weighing, bagging and palletising systems.
- **Oli** – Case packing and compact palletising machines.
- **Zambelli** – High speed shrink wrapping and wrap case packing machines.
- **UnilecSA** – Industrial automation control.
- **Bizerba** – Weighing scales, metal detectors, x-ray and labelling machines.
- **Fuji** – High speed palletising robot.

# BIZERBA

## Features & Benefits

- Filling and packing accuracy.
- High performance.
- Developed proven technology.
- Global standardisation.
- Internationally recognised components.
- Meet international safety and hygienic standards.
- Energy efficient.
- Low maintenance.
- Functional, reliable, and durable.
- Quiet.
- Full after sales support.
