

Storage Handling Systems

NEPTEK offers a wide range of solutions for the handling and storing of totes, boxes and/or pallets in a warehouse or distribution centre. NEPTEK can interface the automation and devices in the warehouse to the client's WMS (Warehouse Management System) through our own WCS/WES/SCADA software. Our software is developed and supported locally and can interface with most WMS platforms such as SAP, Oracle, Manhattan amongst many others.

Solution Types

NEPTEK supply a full range of Storage Handling Solutions to help utilise the full volume of the warehouse and improve the picking, product handling, stock rotation and order fulfilment processes. From fully Automated Storage Retrieval Solutions to Dynamic Roller Flow Tracks housed in Shelving and Racking Systems the solutions we offer include:

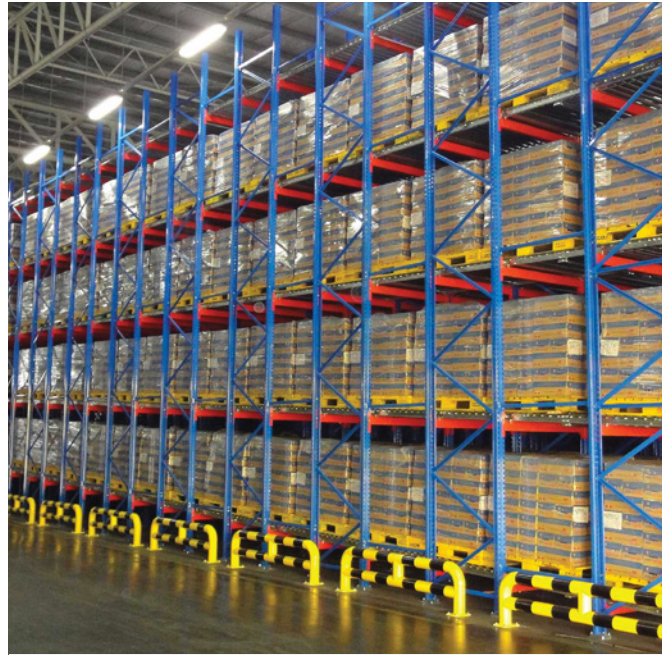

Miniload Systems

Shuttle Systems

Multi-level Conveyor Systems

Pallet Flow and Pallet Push Back

Carton Flow

Pick-By and Put-To Light Systems

Autonomous Mobile Robot (AMR)
Picking Robots

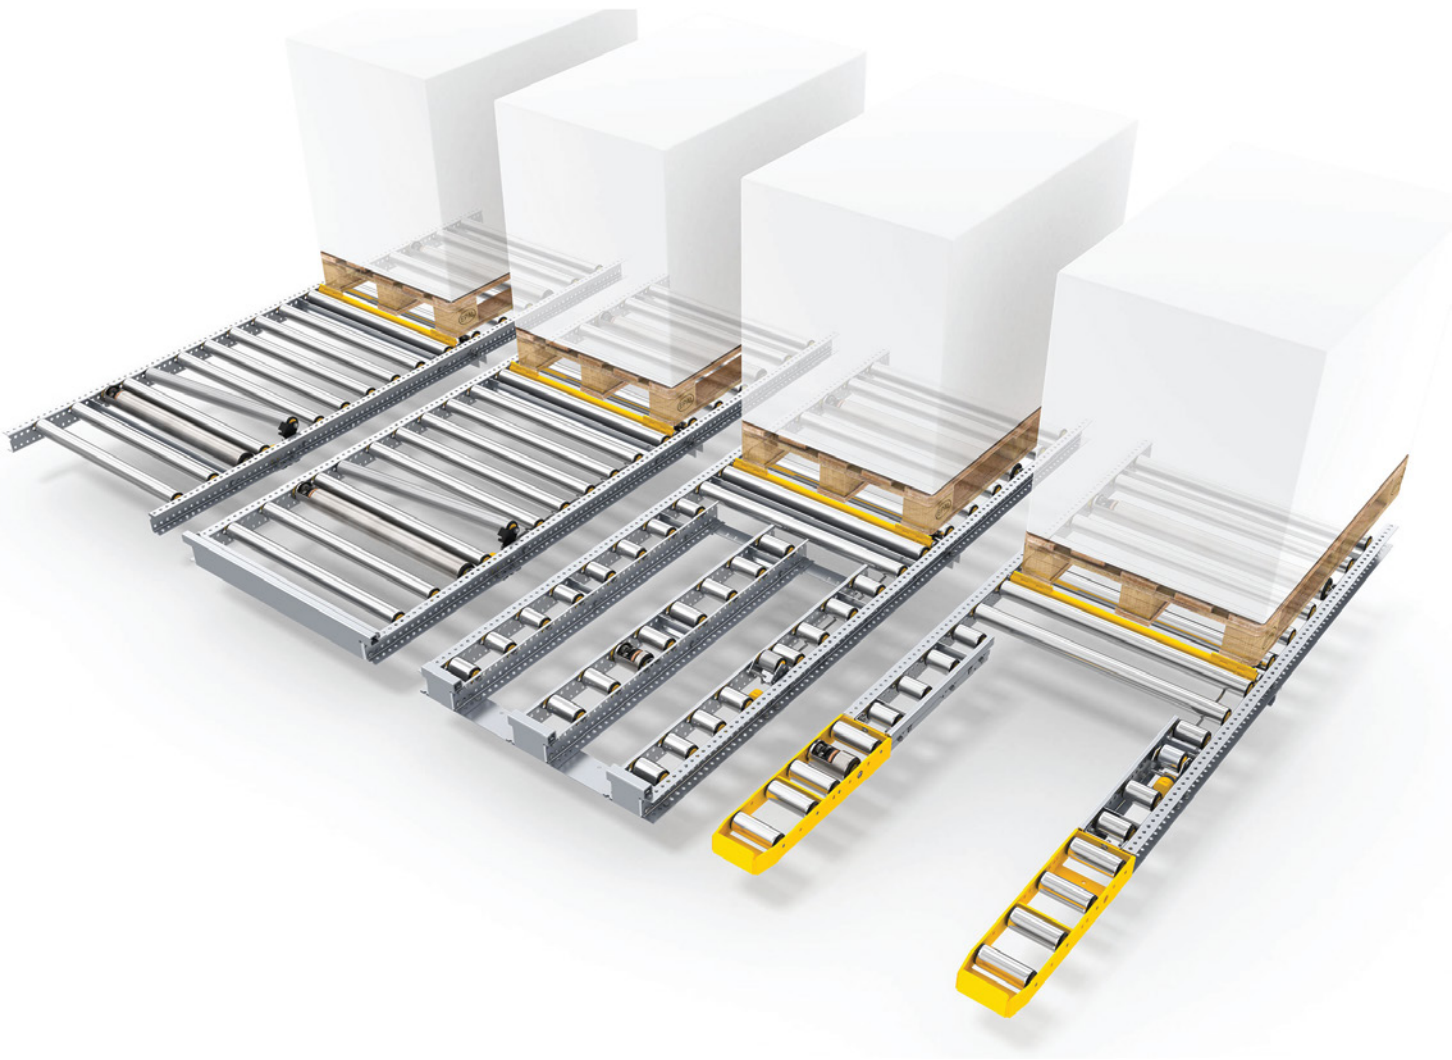

AMR Goods to Man
Picking Stations

Industries

- Fashion and Apparel
- Grocery
- Industrial and Consumer Goods

Features & Benefits

- Universal applications at temperatures down to -30°C
- Direct improved handling.
- Compact multi-deep storage.
- High performance volume utilisation.
- Traceability.
- Safe.
- Energy efficient.
- Low maintenance.
