

Palletising Systems

NEPTEK supply the latest in robotic and layer palletising technology incorporating end of line pallet conveying, load securing, labelling and inspection systems.

The solutions we offer include gripper head palletising robots, compact palletisers, and conventional high-level layer palletisers.

Robotic Palletising

- Robot solutions offer flexibility
- A range of end effectors (gripper heads) to handle most pack types.
- Integration of empty pallet and slip sheet dispensing possible
- Easy to programme and operate
- Low maintenance cost

Compact Palletiser

- Smallest palletising footprint for compact spaces
- Integration of empty pallet and slip sheet dispensing possible
- A range of end effectors (gripper heads) to handle most pack types
- Low maintenance cost

Layer Palletiser

- High speed
- Secured stacking
- Neat layer formation

Load Securing

- Semi and automatic stretch wrap machines
- Stretch hood machines
- Strapping machines

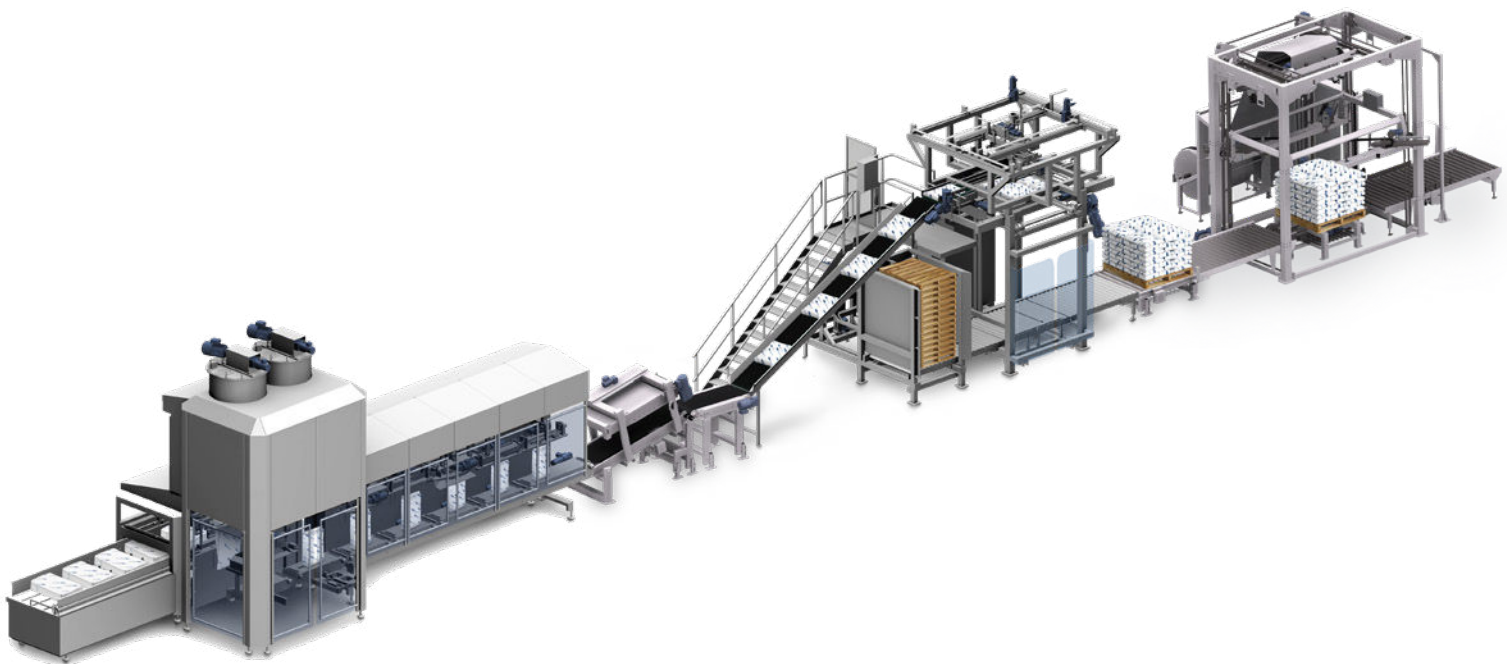

Pallet Conveyor Systems

- Refer to pallet conveyor system brochure for the complete range of solutions.

Features & Benefits

- Fully integrated end of line packing solutions.
- Developed proven technology.
- Global standardisation.
- Internationally recognised components.
- Meet international safety standards.
- High performance.
- Energy efficient.
- Low maintenance.
- Functional, reliable, and durable.
- Full after sales support.
