

Inspection Systems

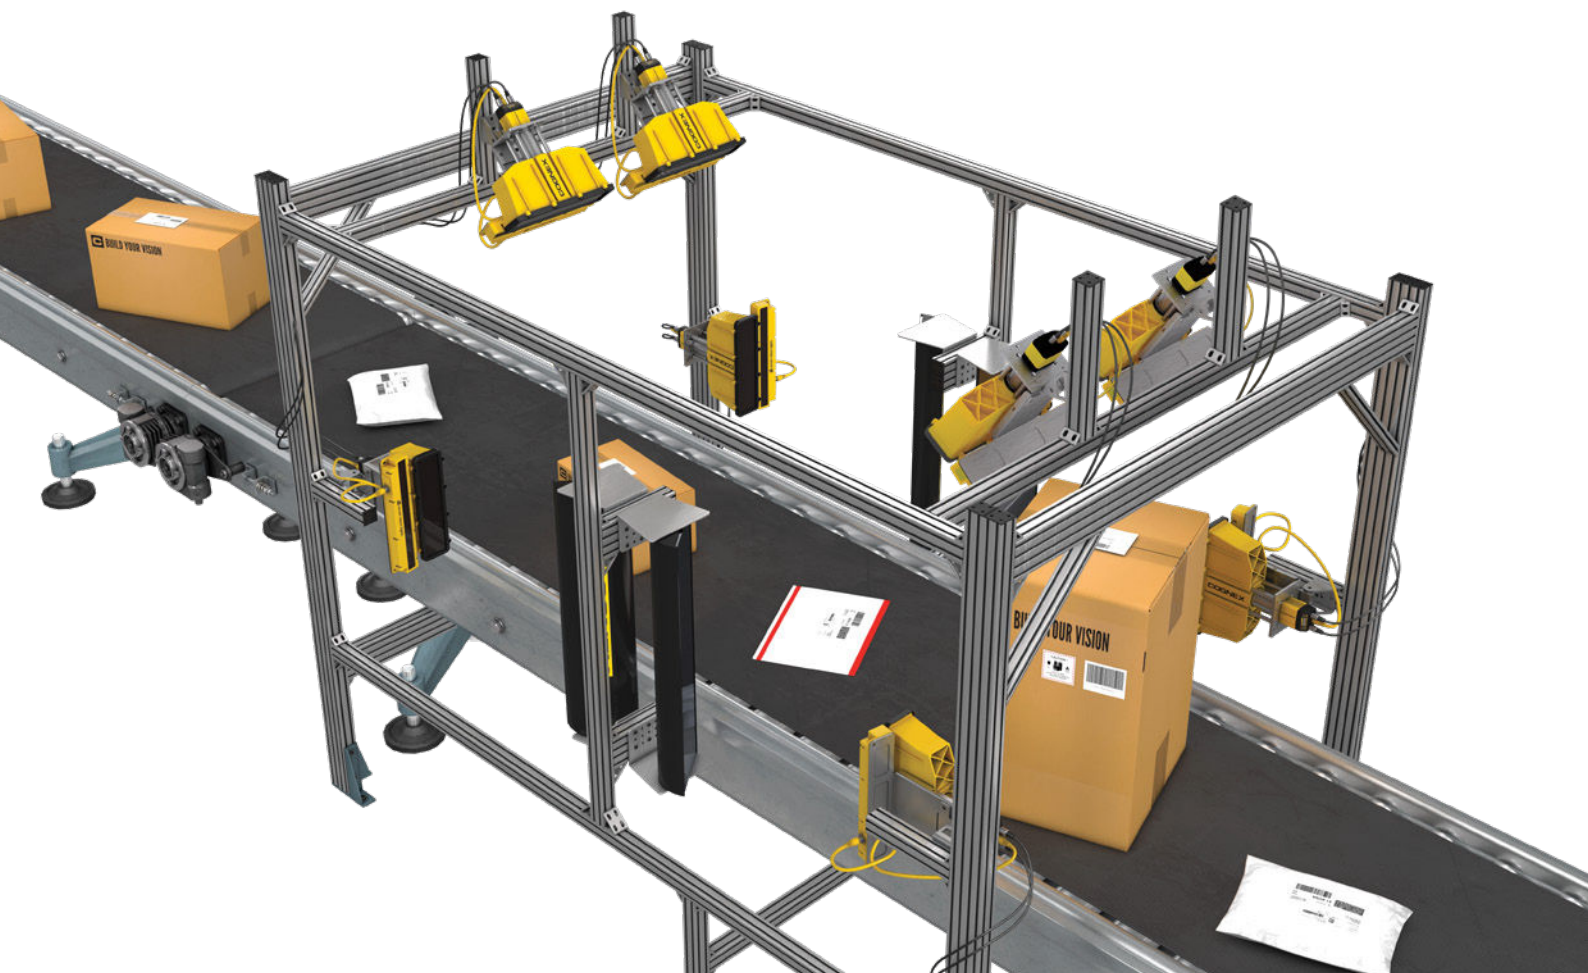

Neptek supply and fully integrate the latest inspection technology in our systems. Capable of scanning, weighing, measuring, imaging, and inspecting products conveyed at high rates through the automated process. In factory automation NEPTEK supply in-line scanning, camera inspection, metal detection, X-ray and check weighing systems as part of our solutions to meet international health and safety standards. In warehouse automation and courier parcel handling solutions NEPTEK offers a range of scanning, volumising, camera recognition and weighing systems with high read rates, accuracy, and reliability. NEPTEK use only proven technology from recognised industry leaders such as Bizerba, SICK, Cognex, Mettler Toledo and Data Logic.

Solution Types

NEPTEK supply an intelligent range of inspection technology as sub systems or fully integrated into our materials handling solutions:

- Camera Recognition and Inspection Systems
- Scanning
- 3D +2D Motion Smart Camera Dimensioning
- Belt Scales (Check Weighing and Weight Recording)
- Metal Detection
- X-Ray Machines

Features & Benefits

- Developed proven technology.
- Global standardisation.
- Meets international hygiene and safety standards.
- Automated verification camera technology.
- Traceability.
- Accurate.
- Fast.
- Energy efficient.
- Low maintenance.
- Durable and reliable.
