

Parcel Handling Systems

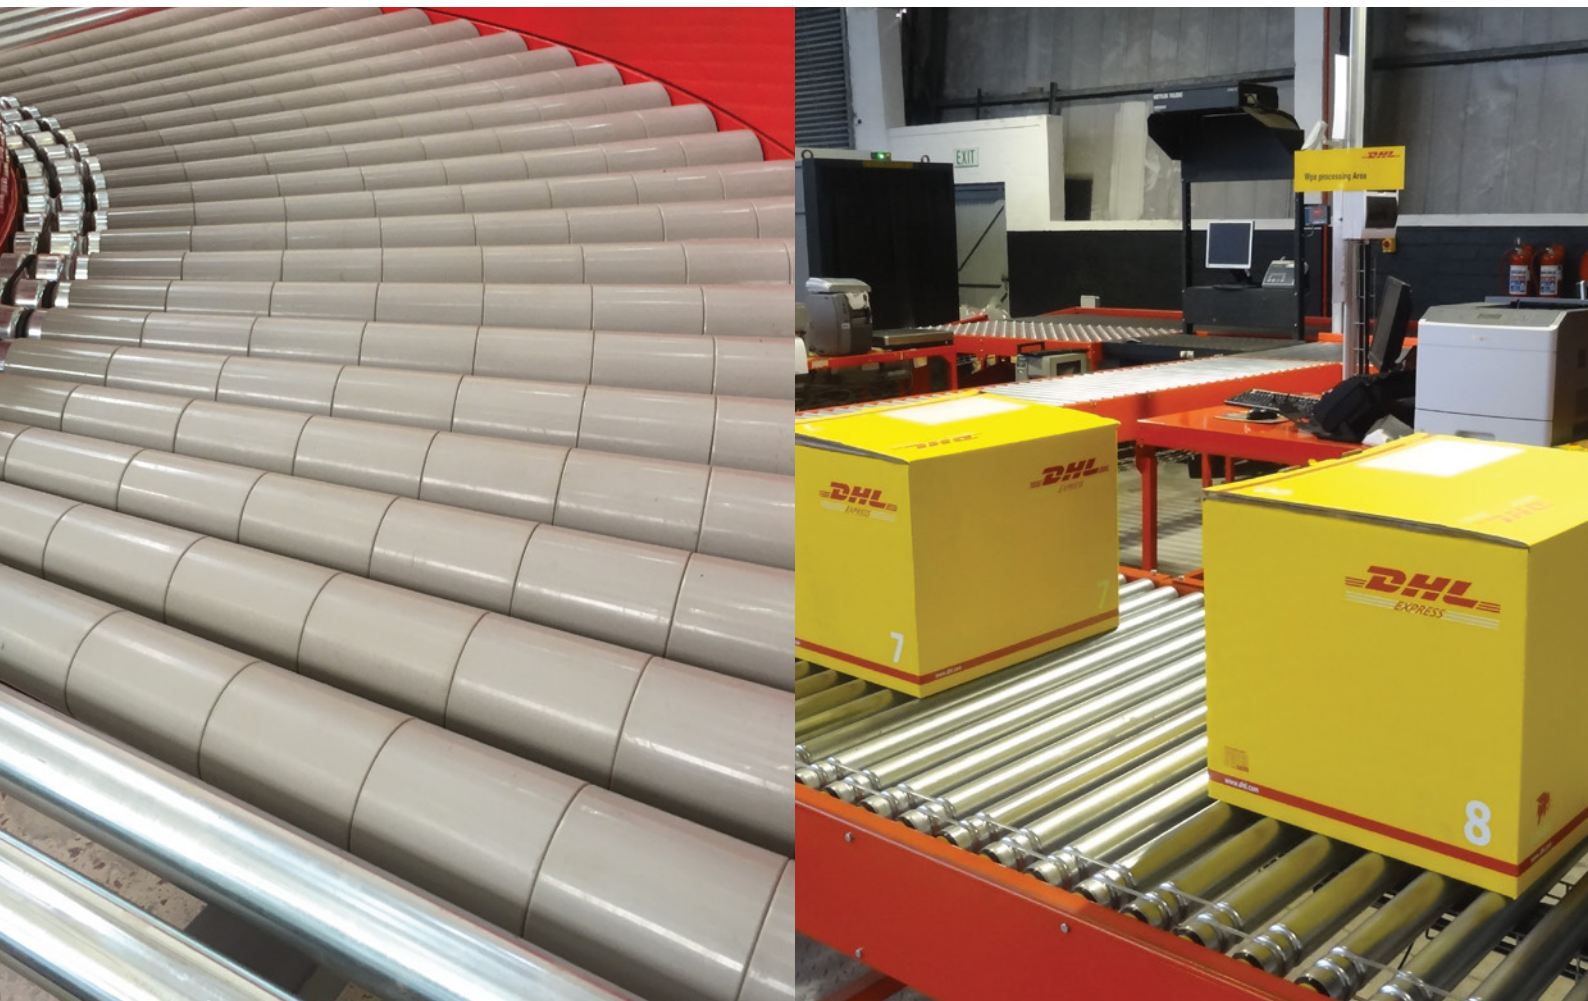

The growth in e-commerce has seen a positive impact on the courier parcel industry with consumers opting to have their goods delivered either to a collection point, retail store close to them or directly to their homes. There has been unprecedented growth over the last few years, and this is poised to grow even faster as purchasing online and having goods delivered direct to the consumer becomes the new norm. Increased capacity, quick deliveries, traceability, accurate billing, and careful handling are essential for any parcel handling business to remain competitive and service their clients. NEPTEK is a specialist in the field of materials handling systems and has a range of parcel handling solutions to meet the vigorous demands placed on this industry.

Solutions

NEPTEK offer a trusted and reliable range of materials handling equipment and systems to service the courier parcel industry:
